Amino Ethyl Piperazine (AEP) Producers and Market Trend

Amino Ethyl Piperazine (AEP) is an ethylene amine with a unique molecular structure, as it contains a primary, secondary and tertiary amine. AEP is a single- component product which is clean, has ammonia-like odour and a colorless with a broad liquid range, making it a suitable raw material for a large variety of applications. Amino Ethyl Piperazine is an organic compound with a wide range of commercial and industrial applications. It is used primarily as reactive intermediates (i.e., building blocks) to produce other useful chemical products, due to its unique combination of reactivity, surface activity, and basicity.

The global Amino Ethyl Piperazine (AEP) market size was USD 53 million in 2017, growing to USD 76 million in 2022, with a CAGR of 7.5% from 2017 to 2022. The global Amino Ethyl Piperazine (AEP) market size is expected to reach USD 97 million in 2027, with a CAGR of 5.0% from 2022 to 2027.
