## **PCB Drill Producers and PCB Drill Market Trend**

Printed circuit board (PCB) drill are consumables dedicated to PCB processing and manufacturing. The PCB provides the function of assembly support and electrical connection of components for various electronic systems, and enjoys the name of "mother of electronic products", which is an important part of the electronic industry. PCB drill can be widely used in IC package substrate, HDI PCB, Rigid PCB and FPCB.

The global PCB drill market size was 463.8 million US\$ in 2017 and will grow to 646.7 million US\$ in 2022, with a CAGR of 6.9% from 2017 to 2022. The global PCB drill market size is expected to reach US\$ 810.3 Mn by 2027, with a CAGR of 4.6% from 2022 to 2027.
